

PVC Ham Radio Tower Project

Written By: Dan

TOOLS:

- [Drill \(1\)](#)
- [Hand saw \(1\)](#)
- [Pliers \(1\)](#)
- [screw driver \(1\)](#)

PARTS:

- [The video outlines the required parts. \(1\)](#)

SUMMARY

I've put together a YouTube video of this project. The parts were purchased at a local hardware store. The total cost was around \$50.

This was a fun project. It has withstood a few powerful storms. In time the PVC will degrade but for an inexpensive project it was enjoyable to do.
